comparing primates lab answer key - Bing

The closest living relatives to the Homo sapiens, the human species, are primates. This lab will compare many of the physical and biochemical characteristics between this group of animals. Examine the drawings of the hands of five different primates shown below. Fill out the table of observations.

Human Evolution Comparing Primates

In this investigation, you will observe and interpret some primate skeletons. Problem How can skeletal evidence be used to help classify primates? Pre-Lab Discussion Read the entire investigation. Then, work with a partner to answer the following questions. 1. How will you compare primates in this investigation? 2.

Comparing Primates - Loudoun County Public Schools

About 6 million years ago, the primates known as hominoids which include gorillas and chimpanzees gave rise to a small group of species now considered to be the closest relatives to humans. This small group of species is called hominids. Hominids, which include humans and closely related primates, are members of the human family known as Hominidae.
