Compare Video Resolution

In other words, a 480p video has a resolution of 852×480 pixels. For comparison, a 720p HD video has 720 lines that are each 1,280 pixels wide, meaning that it is more than twice as sharp as the same video at 480p and can be viewed on a much larger screen.

Understanding Video Resolution - Animoto

Although 4K gets all the buzz as the resolution to have in a TV, 720p and 1080p are also high definition resolutions that are in use. The other characteristic 1080p and 720p share are that they are progressive display formats (that is where the "p" comes from). However, this is where the similarity between 720p and 1080p ends.

720p vs 1080p - A Comparison - Lifewire

Just as in analog video there is both a vertical and horizontal component to digital video resolution. However, the total image resolution displayed in DTV and HDTV is referred to in terms of the number of pixels on the screen rather than lines. Each pixel is composed of a red, green, and blue subpixel.

A Primer On Video Resolution - Lifewire

Video resolution comparison chart - DeRose

If you want a bigger display, go for 32 inch by compromising on the pixel density, else go with the 28 inch display. Also it is not just the resolution and pixel density that matters, but also other technologies the TVs built with. Same picture on two displays will not look the same even though if the displays has same size and pixel density.
