Genomics is an interdisciplinary field of biology focusing on the structure, function, evolution, mapping, and editing of genomes. A genome is an organism's complete set of DNA, including all of its genes. In contrast to genetics, which refers to the study of individual genes and their roles in inheritance, genomics aims at the collective characterization and quantification of genes, which ...

People lived in Scotland for at least 8,500 years before Britain's recorded history. At times during the last interglacial period (130,000–70,000 BC) Europe had a climate warmer than today's, and early humans may have made their way to Scotland, with the possible discovery of pre-Ice Age axes on Orkney and mainland Scotland. Glaciers then scoured their way across most of Britain, and only ...

What you're describing are, in fact, the irreducible elements of a ring; those which cannot be expressed as a non-trivial product (a product of two factors being considered trivial if at least one of them is a unit of the ring).. The concept of irreducibility is more generally applicable than the concept of primality, which is restricted to those rings where factorizations into irreducible ...
