MATPOWER is a package of free, open-source Matlab-language M-files for solving steady-state power system simulation and optimization problems such as power flow (PF), continuation power flow (CPF), extensible optimal power flow (OPF), unit commitment (UC) and stochastic, secure multi-interval OPF/UC. It is intended as a simulation tool for researchers and educators that is easy to use and modify.

Back to top A cell is a flexible type of variable that can hold any type of variable. A cell array is simply an array of those cells. It's somewhat confusing so let's make an analogy. A cell is like a bucket. You can throw anything you want into the bucket: a string, an integer, a double, an...

PCL became a first-class citizen project in March 2011, when Radu B. Rusu, while working as a Research Scientist at Willow Garage, decided to create a separate standalone initiative for 3D point cloud processing and host it under pointclouds.org. Some of the first algorithms that form the foundation of PCL today have been developed independently by many research groups around the world, and ...

In 2011, some time around April, I had a motorcycle accident which left me with a broken right hand. For the next few weeks I was forced to take public transport to work, *shudder* (it takes me twice as long to get to work using Melbourne's public transport than driving).

For problem P2. We need to be a set of functions of .In the figure on the right, we have illustrated a triangulation of a 15 sided polygonal region in the plane (below), and a piecewise linear function (above, in color) of this polygon which is linear on each triangle of the triangulation; the space would consist of functions that are linear on each triangle of the chosen triangulation.

At first glance, SSMPC is a deterministic optimization problem with a large number of constraints. Due to the randomness of sampling N t realizations, the optimal solution $\{M^*, h^*\}$ to SSMPC itself is a random variable. Therefore, whether $\{M^*, h^*\}$ satisfies the chance constraint or not is uncertain. Intuitively, if we have sufficient data samples in the scenario-based problem SSMPC, the risk ...

Gary Olsen, of the Department of Microbiology, University of Illinois, Urbana, Illinois (gary (at) life.uiuc.edu) has developed a speeded-up replacement for my program DNAML coded in C, called fastDNAML version 1.2.2. It achieves a number of economies and also is organized so that it can be run on parallel processors -- he and his co-workers have constructed trees of very large size on a high ...

The United States has made great progress since 1970 in cleaning the air, but the job is far from complete. November 15, 1990 marks a milestone in Clean Air Act history, the signing of the 1990 Amendments. These amendments set the stage for protecting the ozone layer, reducing acid rain and toxic pollutants, and improving air quality and visibility.
