Then solve for v as a function of t . $v = v_0 + at$ [1]. This is the first equation of motion. It's written like a polynomial — a constant term (v_0) followed by a first order term (at). Since the highest order is 1, it's more correct to call it a linear function. The symbol v_0 [vee nought] is called the initial velocity or the velocity at time $t = 0$. It is often thought of as the "first ...
