Dictionaries (or dict in Python) are a way of storing elements just like you would in a Python list. But, rather than accessing elements using its index, you assign a fixed key to it and access the element using the key. What you now deal with is a "key-value" pair, which is sometimes a more appropriate data structure for many problem instead of a simple list.

Python Dictionary Comprehension Tutorial (article) - DataCamp

Without a strong background in basic skills like decoding and vocabulary-building, reading comprehension is impossible. This article offers research-based strategies for building on these and other skills to increase student understanding of what is read.
