The critical path method is a step-by-step project management technique to identify activities on the critical path. It is an approach to project scheduling that breaks the project into several work tasks, displays them in a flow chart, and then calculates the project duration based on estimated durations for each task.

Network Diagrams. One of the most important topics to understand when planning project activities is how to create network diagrams. A network diagram provides a graphical view of activities and how they are related to one another. The PMP exam tests your ability to recognize and understand the most common type of network diagramming method: the precedence diagramming method (PDM).
