Abiogenesis, or informally the origin of life, is the natural process by which life has arisen from non-living matter, such as simple organic compounds. While the details of this process are still unknown, the prevailing scientific hypothesis is that the transition from non-living to living entities was not a single event, but a gradual process of increasing complexity that involved molecular ...

A Failure to Plan Is a Plan to Fail... Most people never develop a vision for their life, let alone for their year. And even when they do come up with some goals, they rarely write them down, almost never create a plan for achieving them, and even rarer still do they put them on their calendar so they actually get done!
