The frog is a part of a horse's hoof, located on the underside, which should touch the ground if the horse is standing on soft footing. The frog is triangular in shape, and extends mid way from the heels toward the toe, covering around 25% of the bottom of the hoof.

Frog (horse anatomy) - Wikipedia

Equine anatomy refers to the gross and microscopic anatomy of horses and other equids, including donkeys, and zebras. While all anatomical features of equids are described in the same terms as for other animals by the International Committee on Veterinary Gross Anatomical Nomenclature in the book *Nomina Anatomica Veterinaria*, there are many horse-specific colloquial terms used by equestrians
