booknowmed.com - Book your dialysis online

Dialysis is a procedure that performs many of the normal duties of the kidneys, like filtering waste products from the blood, when the kidneys no longer work adequately. There are two types of dialysis, hemodialysis and peritoneal dialysis. The life expectancy for a person on dialysis depends upon the type of dialysis treatment and any other medical condition he or she may have.

Access Manager is the ultimate tool developed by nephrologists and interventionalists to facilitate the management of access care and reduce the cost associated with access management for Access Centers & Dialysis clinics. Doctors and administrators all can have instant access to patient records securely over the web, any time, 24 hours a day, 7 days a week.

Renesan Software - Advanced EMR Solutions

A session of peritoneal dialysis can take several hours or can last overnight, depending on the way it's done. Peritoneal dialysis is an alternative to the kind of dialysis most people are familiar with -- hemodialysis, in which blood is run from a patient through a dialysis machine that removes wastes and liquid.

You will need dialysis treatment anywhere from a few times a week to several times daily, depending on the method prescribed. Conventional hemodialysis requires visits to a clinic three times a week.

How often will I need dialysis? | Dialysis - Sharecare

Your kidneys' main job is to remove toxins and extra fluid from your blood. If waste products build up in your body, it can be dangerous and even cause death. Hemodialysis (and other types of dialysis) does some of the job of the kidneys when they stop working well. Hemodialysis can:
Remove extra ...
