Git and GitHub. If you're serious about software development, you need to learn about Git. Git is a version control system, a tool that tracks changes to your code and shares those changes with others. Git is most useful when combined with GitHub, a website that allows you to share your code with the world, solicit improvements via pull requests and track issues.

Email marketing is a valuable and inexpensive way for small-business owners to promote brand awareness. It allows them to reach out to past customers, introduce themselves to future ones and provide people with special offers.

3 Ways to Do Email Marketing - wikiHow

Should be very easy but I can't get it to work. As described in the title I would like to change onmouseover the background-color from span.name (orange)

onmouseover="this.style... is working but I need something ...

I think the best way to do this is to use event.preventDefault() because if some exception is raised

in the handler, then the return false statement will be skipped and the behavior will be opposite to what you want.. But if you are sure that the code won't trigger any exceptions, then you can go with any of the method you wish.

event.preventDefault() vs. return false - Stack Overflow

Build 30 things with vanilla JS in 30 days with 30 tutorials. I found another way! Could it be?! Yes! There are probably 100 different ways to solve each of these exercises, if your answer doesn't line up with mine, it means you did a really good job at trying to figure it out yourself.

Why Pay Off Student Loans Early? Contrary to popular belief... This is not necessarily something you should do. The basic premise is that you can earn a higher return on the cash you don't spend on repaying your loans, netting you more money in the long run (i.e., over the 15 years or so you're supposed to pay them) than if you paid them off immediately.
