Overview of Cost Estimating . Cost estimating is the practice of forecasting the cost of completing a project with a defined scope. It is the primary element of project cost management, a knowledge area that involves planning, monitoring, and controlling a project's monetary costs.

### **Ultimate Guide to Project Cost Estimating | Smartsheet**

What is benefit? How do we define it? How do we measure it? The Financial Perspective. There is a tradition, particularly with finance managers and accountants, that benefit is simply a question of projecting the effect on profit (ie revenue minus expenditure) over a given period of time and comparing it against the position the organisation would be in without the project, ie:
