Os softwares para os primeiros computadores foram escritos principalmente em linguagem assembly por muitos anos. As linguagens de alto nível de programação não foram inventadas até que os benefícios de ser capaz de reutilizar software em diferentes tipos de CPUs passassem a ser significativamente maiores do que o custo de se escrever um compilador.

Historique. Les logiciels des premiers ordinateurs [3] étaient écrits en langage assembleur [4]. Les langages de programmation de plus haut niveau (dans les couches d'abstraction) n'ont été inventés que lorsque les avantages apportés par la possibilité de réutiliser le logiciel sur différents types de processeurs sont devenus plus importants que le coût de l'écriture d'un compilateur.
