Boundary Value Problems. As we'll see in the next chapter in the process of solving some partial differential equations we will run into boundary value problems that will need to be solved as well. In fact, a large part of the solution process there will be in dealing with the solution to the BVP.

Differential Equations - Boundary Value Problems

12 Chapter 1 Introduction is an initial value problem for a second order differential equation where y and y_0 are required to have specified values at $x = 0$. In general, an initial value problem for an n -th order differential equation requires y and its first $n-1$ derivatives to have specified values at some point x_0 .
