Cell Biology

Comparing Plant and Animal Cells Elodea Leaves & Cheek Cells Question: How does an animal cell compare to a plant cell? How are they the same and how are they different? Prediction: Do you think an animal cell and a plant cell will share some qualities or do ... Elodea & Cheek Cell Lab Created Date:

Elodea & Cheek Cell Lab - Weebly

A. Plant Cells. Elodea is a decorative aquatic plant often found in fish tanks. A small leaf has been removed from the plant and placed with the lower surface down in a drop of water on a microscope slide. If you examine the leaf using the scanning lens you will find the midrib running down the center of the leaf.

Virtual Biology Labs - Rutgers University

Elodea cells also contain a vacuole, which is filled with a liquid called cell sap that is primarily made up of water. The structure of elodea cells also differ from onion cells. Elodea cells are in two layers of varying sizes; one layer is long and narrow, and the second layer is short and wide.

How Do Elodea Cells Compare to Onion Cells? | Reference.com

Before exploring the details of cell structure, let's understand the differences in the structure of an onion cell and a human cheek cell. Onion Cell. An onion is a multicellular (consisting of many cells) plant organism. As in all plant cells, the cell of an onion peel consists of a cell wall, cell membrane, cytoplasm, nucleus and a large vacuole.
