Job hazard analysis takes place prior to starting new work activities. A sample form and more detailed instruction is included in the MIOSHA Job Safety Analysis booklet (SP #32).

Construction Safety & Health Management System

Etymology. Construction is a general term meaning the art and science to form objects, systems, or organizations, and comes from Latin constructio (from com-"together" and struere "to pile up") and Old French construction. To construct is the verb: the act of building, and the noun construction: how a building was built, the nature of its structure.

Hazard assessments are required under OSHA regulations for deciding what personal protective equipment controls may be needed for hazards on the job. A literal reading would even suggest that they be completed for work tasks that may not require the use of personal protective equipment. This would be necessary simply to make the determination that personal protective equipment is not needed.

Hazard Assessments | EHS Today
