AP Computer Science: eIMACS — College Confidential

9. It takes an array of Book objects and an author's name (a String) and returns an array of Book objects containing just those elements of the input array that were written by the given author.

eimacs test 12 answers - Pastebin.com

I need help with this program. Can't get it to work. The removeExtension method is designed to input a name or 3-digit extension number (presented in the form of a String), and remove from the extensions array the first entry it finds that matches either the name or the extension (or both). If such a removal takes place, the size of the extensions array is reduced by 1.
