dichotomous comes from two Greek words that together mean, "divided in two parts". In each step of a dichotomous key two choices are given with directions for what to do next. Each choice leads either to another choice or the identity of the object or organism. Some dichotomous keys are lists of questions, while some look more like charts.

**Using a Dichotomous Key - ewsonline.org**

Dichotomous keys use external physical characters, which can be observed easily and quickly. A cladogram can also use characters that are not easily observed, such as internal anatomy or DNA sequences. Sample answer: A dichotomous key is a tool used to sort and identify organisms. The key does not sort organisms based on evolutionary relationships.
