Step 1 Identify two variables. In Problem 1.1, the two variables are time and number of jumping jacks. Step 2 Select an axis to represent each variable. Often, you can assign each variable to an axis by thinking about how the variables are related. If one variable depends on the other, put the on the (the vertical axis) and the

One of the goals of Connected Mathematics is to assist children in figuring out as much as they can for themselves. You can help by asking questions that guide, without telling what to do or giving away answers. Good questions and good listening will help children make sense of mathematics, build self-confidence, and encourage mathematical thinking and communication.
