Chemistry is the natural science involved with elements and compounds composed of atoms, molecules and ions: their composition, structure, properties, behavior and the changes they undergo during a reaction with other substances.. In the scope of its subject, chemistry occupies an intermediate position between physics and biology. It is sometimes called the central science because it provides ...

Klebsiella is a type of bacteria commonly found in nature. In humans, the bacteria are often present in parts of the digestive tract where they do not generally cause problems. In the United States, Klebsiella pneumoniae and Klebsiella oxytoca are the two strains responsible for most human illnesses. Many Klebsiella infections are acquired in the hospital setting or in long-term care facilities.
