The history of computing hardware covers the developments from early simple devices to aid calculation to modern day computers. Before the 20th century, most calculations were done by humans. Early mechanical tools to help humans with digital calculations, like the abacus, were called "calculating machines", called by proprietary names, or referred to as calculators.

I am now a grandma of 5 from three children of my own. If I could go back I would work much harder at discovering who my children were created to be and focus on their gifts by sharpening them as opposed to conforming them into who I wanted them to be and working on them being well rounded people knowing just a little of everything and squelching their passion of life to the full by expecting ...
