Economics Concepts And Choices Answer

Wants - Simply the desires of citizens. Wants are different from needs as we will see below. Wants are a means of expressing a perceived need. Wants are broader than needs. Needs: These are basic requirements for survival like food and water and shelter. In recent years we have seen a perceived shift of certain items from wants to needs.

Urban economics is broadly the economic study of urban areas; as such, it involves using the tools of economics to analyze urban issues such as crime, education, public transit, housing, and local government finance. More narrowly, it is a branch of microeconomics that studies urban spatial structure and the location of households and firms (Quigley 2008).

Urban economics - Wikipedia

Mathematical economics is the application of mathematical methods to represent theories and analyze problems in economics. By convention, these applied methods are beyond simple geometry, such as differential and integral calculus, difference and differential equations, matrix algebra, mathematical programming, and other computational methods. ...
