At its height, the boundaries of the Roman Empire stretched from the north of England across the North Sea, along the Rhine and Danube Rivers to the Caspian Sea, south to Egypt, along the coast of Africa to Spain. The decline and eventual collapse of this vast empire took place over a period of years before reaching its bitter end in the middle of the 5th century.

Peak oil is the point in time when the maximum rate of global petroleum production is reached, after which the rate of production enters its terminal decline. If global consumption is not mitigated before the peak, an energy crisis may develop because the availability of conventional oil will drop and prices will rise, perhaps dramatically.
