Background. The purpose of this study is to use 3-dimensional printing (3DP) polyetheretherketone (PEEK) implants for skeletal reconstructions after wide excision of chest wall. 3DP PEEK implants were expected to provide a better physiological simulation than traditional ones because of a closer elastic modulus to cortical bone and similar biomechanical properties.

Burst a report to distribute its contents to various recipients. Bursting is the process of running a report once and then dividing the results for recipients who each view a subset of the data. For example, salespeople in different regions each need a report showing the sales target for their country or region. You use burst reports to send each salesperson only the information they need.
