Econometrics is the application of statistical methods to economic data in order to give empirical content to economic relationships. More precisely, it is "the quantitative analysis of actual economic phenomena based on the concurrent development of theory and observation, related by appropriate methods of inference". An introductory economics textbook describes econometrics as allowing ...

Herbert W. Heinrich was a pioneering occupational safety researcher, whose 1931 publication Industrial Accident Prevention: A Scientific Approach [Heinrich 1931] was based on the analysis of accident data collected by his employer, a large insurance company. This work, which continued for more than thirty years, identified causal factors of industrial accidents including “unsafe acts of ...
