At school, at work, and in everyday life, argument is one of main ways we exchange ideas with one another. Academics, business people, scientists, and other professionals all make arguments to determine what to do or think, or to solve a problem by enlisting others to do or believe something they otherwise would not.

Chapter 3 - Argument - Let's Get Writing!

Learning Python, 5th Edition - O'Reilly Media

A database index is a data structure that improves the speed of data retrieval operations on a database table at the cost of additional writes and storage space to maintain the index data structure. Indexes are used to quickly locate data without having to search every row in a database table every time a database table is accessed. Indexes can be created using one or more columns of a ...

Database index - Wikipedia

When we introduced the type BookStore, we deliberately chose to give the type constructor BookStore a different name from the value constructor Book, purely to make it obvious which was which.. However, in Haskell, the names of types and values are independent of each other. We only use a type constructor (i.e. the type's name) in a type declaration or a type signature.
