1. Introduction. In the field of management of technology and innovation, the ecosystem concept is of increasing significance (Adner and Kapoor, 2010, Kapoor and Lee, 2013, Meyer et al., 2005, Pierce, 2009, Teece, 2007), although the term ecosystem seems to be used without clear definition or sound theoretical backing. This paper poses three basic questions at the start of the review process.

Self-organization, also called (in the social sciences) spontaneous order, is a process where some form of overall order arises from local interactions between parts of an initially disordered system. The process can be spontaneous when sufficient energy is available, not needing control by any external agent. It is often triggered by random fluctuations, amplified by positive feedback.

In this chapter we will look at solving systems of differential equations. We will restrict ourselves to systems of two linear differential equations for the purposes of the discussion but many of the techniques will extend to larger systems of linear differential equations. We also examine sketch phase planes/portraits for systems of two differential equations.
