A 4% (w/w) HPMC binder solution was prepared by mixing HPMC with 1/4 of the water at $>80^{\circ}\text{C}$. After mixing for 5–10 min, the rest of the water at room temperature was added. The binding solution was cooled off overnight and was used within 24 h after preparation. The lactose and the cornstarch were placed in the powder bed container of the fluid bed and mixed by using airflow (see Table 3) till ...

1. Introduction. From the 1940s to the 1970s, mail and face-to-face surveys were the main modes of data collection (Lyberg and Kasprzyk, 1991). However, the increasing rates of telephone coverage, the low cost of telephone surveys relative to face-to-face interviews, the speed with which telephone surveys can be conducted, as well as the quality of the data produced via phone surveys have all ...

The scale of a map is the ratio of a distance on the map to the corresponding distance on the ground. This simple concept is complicated by the curvature of the Earth's surface, which forces scale to vary across a map. Because of this variation, the concept of scale becomes meaningful in two distinct ways.

An ability check tests a character's or monster's innate talent and training in an effort to overcome a challenge. The GM calls for an ability check when a character or monster attempts an action (other than an attack) that has a chance of failure. When the outcome is uncertain, the dice determine the results.

The concept of a fractal dimension rests in unconventional views of scaling and dimension. As Fig. 4 illustrates, traditional notions of geometry dictate that shapes scale predictably according to intuitive and familiar ideas about the space they are contained within, such that, for instance, measuring a line using first one measuring stick then another 1/3 its size, will give for the second ...

Thorlabs' cemented Achromatic Doublets are optimized to provide excellent performance in the visible region. Our design for the achromatic doublets uses the helium d line (587.6 nm, yellow) and the hydrogen F (486.1 nm, blue/green) and C (656.3 nm, red) lines since these wavelengths reasonably

The size of t is available to both the owner watermark and to the attacker. As long as t remains in the imperceptible region, there exists some t' use by the attacker where $l' = v + t'$ and there is no perceptible difference between l and l' . This attack may be used to remove or replace the t region. A variation of this attack is explored in [CMYY97] to the aspect of counterfeiting watermarks.

INTRODUCTION. Dietary pattern is among the most fundamentally important of health influences (46, 54, 60-62, 81, 139, 145). The full scope of health effects, both good and bad, attributable to all variations on the theme of dietary pattern defies calculation because of the complexities of the causal pathway.
