Childhood amnesia, also called infantile amnesia, is the inability of adults to retrieve episodic memories (memories of situations or events) before the age of two to four years, as well as the period before the age of ten of which adults retain fewer memories than might otherwise be expected given the passage of time. The development of a cognitive self is also thought by some to have an ...

Retrograde amnesia (RA) is a loss of memory-access to events that occurred, or information that was learned, before an injury or the onset of a disease. It tends to negatively affect episodic, autobiographical, and declarative memory while usually keeping procedural memory intact with no difficulty for learning new knowledge. RA can be temporally graded or more permanently based on the ...

The year 2002 could probably be described as "the best of times, and the worst of times." On one level, Korean cinema continued its breathtaking run of popularity with local audiences, winning over a 45.2% market share in Seoul, only slightly lower than the 46.1% recorded in 2001 (market share in Korea as a whole was likely higher, but harder to measure).

The Silence of Others reveals the epic struggle of victims of Spain's 40-year dictatorship under General Franco, who continue to seek justice to this day. Filmed over six years, the film follows victims and survivors as they organize the groundbreaking "Argentine Lawsuit" and fight a state-imposed amnesia of crimes against humanity, in a country still divided four decades into democracy.

Trauma-informed care (TIC) involves a broad understanding of traumatic stress reactions and common responses to trauma. Providers need to understand how trauma can affect treatment presentation, engagement, and the outcome of behavioral health services. This chapter examines common experiences survivors may encounter immediately following or long after a traumatic experience.
