Yahoo New Zealand Answers ... Computer science help? Write a complete Java program that simulates the rolling of a pair of dice. For each die in the pair, the program should generate a random number between 1 and 6 (inclusive). It should print out the result of the roll for each die and the total roll (the sum of the two dice), all ...

computer science help? | Yahoo Answers

Best Answer: In these problems, the student is expected to determine the output without compiling and running the actual code. This is a recursive function, and the idea that the output should start with "0" is incorrect. The call is printNums(3) Since $n = 3$, it bypasses the first "if" statement. Then, in ...

Can I still be successful in Computer Science and its field if I don't know much about computers? I joined a tech club at my high school, and everybody else knows a lot of stuff and know how to do things that I had no idea about or how to do. I feel kind of overwhelmed. Do I have to know as much as they do to be successful in the field?

Computer science? | Yahoo Answers

I'm a junior in high school and thinking about what I might want to study in college. I'm wondering about computer science because I really like working with computers...for example I love designing and coding websites and I taught myself html and how to use wordpress. some questions: what kind of things do you learn? what careers are available with a major in cs?
