The BCIT Geomatics Engineering Technology diploma program is a two year course of study leading to a Diploma in Geomatics that is Nationally Accredited. Students in this program acquire a solid background in applied math, physics, cartography, photogrammetry, plane surveying, geodetic surveying and computer applications.

Geomatics Engineering Technology: Full-time, Diploma - BCIT

A pendulum is a weight suspended from a pivot so that it can swing freely. When a pendulum is displaced sideways from its resting, equilibrium position, it is subject to a restoring force due to gravity that will accelerate it back toward the equilibrium position. When released, the restoring force acting on the pendulum's mass causes it to oscillate about the equilibrium position, swinging ...

The area of study known as the history of mathematics is primarily an investigation into the origin of discoveries in mathematics and, to a lesser extent, an investigation into the mathematical methods and notation of the past. Before the modern age and the worldwide spread of knowledge, written examples of new mathematical developments have come to light only in a few locales.
