The T variable in the I=PAT equation represents how resource intensive the production of affluence is; how much environmental impact is involved in creating, transporting and disposing of the goods, services and amenities used. Improvements in efficiency can reduce resource intensiveness, reducing the T multiplier. Since technology can affect environmental impact in many different ways, the ...

Racial fears, affordable housing, and the desire to leave decaying cities were all factors that prompted many white Americans to flee to suburbia. And no individual promoted suburban growth more than William Levitt. Contracted by the federal government during the war to quickly build housing for military personnel, Levitt applied the techniques of mass production to construction.
