Summary | Cost Accounting — AccountingTools

To illustrate process costing, let's assume that a product requires several processing operations—each of which occurs in a separate department. The costs of Department One for the month of June amount to \$150,000 of direct materials and \$225,000 of conversion costs (direct labor and manufacturing overhead).

What is process costing? | AccountingCoach

Standard cost accounting. Adding this to the variable costs of \$300 per coach produced a full cost of \$325 per coach. This method tended to slightly distort the resulting unit cost, but in mass-production industries that made one product line, and where the fixed costs were relatively low, the distortion was very minor.
