Taking notes allows you to make sense of the material you're reading and consider how it relates to the topic and point of view you will lay out in your paper. Regardless of the type of documents you use, you should note certain elements after you've created your summary and are ready to re-read the document.

The terms taxonomy, ontology, directory, cataloging, categorization and classification are often confused and used interchangeably. These are all ways of organizing information (or things or animals) into categories. There are a number of applications that can help people create taxonomies and place information objects within their categories, although the amount of automation can vary. Some ...

The Export Administration Regulations (EAR) are a set of regulations found at 15 C.F.R. § 730 et seq. They are administered by the Bureau of Industry and Security, which is part of the US Commerce Department. In general, the EAR govern whether a person may export a thing from the U.S., reexport the thing from a foreign country, or transfer a thing from one person to another in a foreign country.

Decision Trees. Classification and Regression Trees or CART for short is a term introduced by Leo Breiman to refer to Decision Tree algorithms that can be used for classification or regression predictive modeling problems.. Classically, this algorithm is referred to as “decision trees”, but on some platforms like R they are referred to by the more modern term CART.

Basic characteristics of soils Size range of grains. Aids to size identification; The range of particle sizes encountered in soil is very large: from boulders with a controlling dimension of over 200mm down to clay particles less than 0.002mm (2mm). Some clays contain particles less than 1 mm in size which behave as colloids, i.e. do not settle in water due solely to gravity.
