A cancer survivor is a person with cancer of any type who is still living. Whether a person becomes a survivor at the time of diagnosis or after completing treatment, whether people who are actively dying are considered survivors, and whether healthy friends and family members of the cancer patient are also considered survivors, varies from group to group.

I heard the Food and Drug Administration unofficially back in 1998 or 1999 stated that it was healthier to drink the water out of the Hudson river, than to eat American processed food with all the junk they put in it. Over all if it's company canned or boxed doesn't matter it's bad for your health in the long run.

Although alcohol use is necessary for ALD, excessive alcohol use does not necessarily promote ALD. In heavy drinkers, only 1 in 5 develops alcoholic hepatitis and 1 in 4 develops cirrhosis. 5 Fatty liver is a universal finding among heavy drinkers 5 and up to 40% of those with moderate alcohol intake (10-80 mg/day) also exhibit fatty liver changes. 3 Based on an autopsy series of men, a ...
