The time is also ripe to enhance coastal resilience by incorporating natural and hybrid infrastructure into coastal policy and planning. In the U.S., there has never before been such high-level attention within the federal sector on using natural and restored features along the coasts to reduce vulnerability to natural hazards and disasters.

Fire ecology is a scientific discipline concerned with natural processes involving fire in an ecosystem and the ecological effects, the interactions between fire and the abiotic and biotic components of an ecosystem, and the role as an ecosystem process. Many ecosystems, particularly prairie, savanna, chaparral and coniferous forests, have evolved with fire as an essential contributor to ...

A hydrothermal vent is a fissure on the seafloor from which geothermally heated water issues. Hydrothermal vents are commonly found near volcanically active places, areas where tectonic plates are moving apart at spreading centers, ocean basins, and hotspots. Hydrothermal deposits are rocks and mineral ore deposits formed by the action of hydrothermal vents.

Section Editor rating: 8 / 10 Dezene Huber -- Considering the concern (and often reality) of global pollinator declines, it is interesting that the quality of nectar offering by wild and cultivated plants across a geographical range has not been much considered. This paper, as the authors point out, is a good first step in this direction and may help to set the trajectory for further studies.

FORCES . A force is any push or pull that causes an object to move, stop, or change speed or direction.; The greater the force, the greater the change in motion will be. The more massive an object, the less effect a given force will have on the object.; Unless acted on by a force, objects in motion tend to stay in motion and objects at rest remain at rest.
