The Crank–Nicolson method is based on the trapezoidal rule, giving second-order convergence in time.For example, in one dimension, if the partial differential equation is ∂ ∂ = (,,, ∂ ∂, ∂ ∂) then, letting (,) =, the equation for Crank–Nicolson method is a combination of the forward Euler method at and the backward Euler method at n + 1 (note, however, that the method itself is ...

A rapid industrial development causes several environment pollution problems. One of the main problems is air pollution, which affects human health and the environment. The consideration of an air pollutant has to focus on a polluted source. An industrial factory is an important reason that releases the air pollutant into the atmosphere. Thus a mathematical model, an atmospheric diffusion ...
