Differential geometry is a mathematical discipline that uses the techniques of differential calculus, integral calculus, linear algebra and multilinear algebra to study problems in geometry.The theory of plane and space curves and surfaces in the three-dimensional Euclidean space formed the basis for development of differential geometry during the 18th century and the 19th century.

In geometria differenziale il tensore di Ricci è un tensore che misura la curvatura di una varietà riemanniana.Si ottiene contraendo due indici del tensore di Riemann.Il tensore di Ricci, che deve il suo nome a Gregorio Ricci Curbastro, è un ingrediente dell'equazione di campo di Einstein ed è quindi importante per la formulazione della relatività generale.
