Concentrated Solution Definition

Concentrated Definition (Chemistry) A concentrated solution contains the maximum amount of solute that can be dissolved. Because solubility depends on temperature, a solution that is concentrated at one temperature may not be concentrated at a higher temperature. The term may also be used to compare two solutions, as in "this one is more concentrated than that one".

Concentrated Definition (Chemistry) - ThoughtCo

A concentrated solution is one in which there is a large amount of substance present in a mixture. The degree of concentration is measured in moles. Keep Learning.

What Is a Concentrated Solution? | Reference.com

to bring or draw to a common center or point of union; converge; direct toward one point; focus: to concentrate one's attention on a problem; to concentrate the rays of the sun with a lens. to put or bring into a single place, group, etc.: The nation's wealth had been concentrated in a few families.

Concentrated | Definition of Concentrated at Dictionary.com

koncentrirana otopina. Concentrated solution is a solution that contains a large amount of solute relative to the amount that could dissolve.

Concentrated solution @ Chemistry Dictionary & Glossary

Concentrated solution is a solution that contains a large amount of solute relative to the amount that could dissolve. Go science math history literature technology health law business All Sections

What is the definition of concentrated solutions - answers.com

A dilute solution is one in which there is a relatively small amount of solute dissolved in the solution. A concentrated solution contains a relatively large amount of solute. These two terms do not provide any quantitative information (actual numbers) - but they are often useful in comparing solutions in a more general sense. These terms also do not tell us whether or not the solution is saturated or unsaturated, or whether the solution is "strong" or "weak".

2.1 Dilute & Concentrated Solutions - Chemistry LibreTexts

A concentrated solution is a solution where the solvent has a lot of solute in the solution. A solution that is filled to capacity is called a saturated solution. There are many compounds that are not active unless they are dissolved into solution. Yet we still want the full potency of the solute.

Concentration of Solutions: Definition & Levels | Study.com

To make (a solution or mixture) less dilute. To converge toward or meet in a common center. A product that has been concentrated, especially a food that has been reduced in volume or bulk by the removal of liquid: pineapple concentrate. American Heritage® Dictionary of the English Language, Fifth Edition.

Concentrated - definition of concentrated by The Free ...

Concentration Definition. Two related terms are concentrated and dilute. Concentrated refers to chemical solutions that have high concentrations of a large amount of solute in the solution. Dilute solutions contains a small amount of solvent compared with the amount of solvent. If a solution is concentrated to the point where no more solute will...

Concentration | Definition of Concentration at Dictionary.com

Concentration. The term concentration can be applied to any kind of chemical mixture, but most frequently it refers to solutes and solvents in solutions. The molar (amount) concentration has variants such as normal concentration and osmotic concentration .

Concentration - Wikipedia

Concentrated often refers to a liquid solution that's very strong, but it can describe anything that's condensed into one area. When you finally clean your bedroom, you'll have to pick up the clothes that are scattered everywhere so they're concentrated in the closet.

concentrated - Dictionary Definition: Vocabulary.com

Define concentration. concentration synonyms, concentration pronunciation, concentration translation, English dictionary definition of concentration. n. 1. a. The act or process of concentrating, especially the fixing of close, undivided attention. b. The condition of being concentrated. 2.

Concentration - definition of concentration by The Free ...

Concentration The concentration of a solution is the proportion of the solute to solvent. If there is a lot of solute in a solution, then it is "concentrated". If there is a low amount of solute, then the solution is said to be "diluted." Miscible and immiscible When two liquids can be mixed to form a solution they are called "miscible."

Chemistry for Kids: Solutions and Dissolving - Ducksters

A dilute solution has a low concentration of the solute compared to the solvent. The opposite of a dilute solution is a concentrated solution, which has high levels of solute in the mixture. Keep Learning.

What Is a Dilute Solution? | Reference.com

Definition. noun (1) The measure of the amount of a sub-component (especially solute) ... the term concentration refers to the measure of the amount of a sub-component in a solution. For instance, the concentration of a solute in a solution pertains to the ratio of the mass or volume of the solute to the mass or volume of the solvent.

Concentration - Biology-Online Dictionary | Biology-Online ...

A solution is defined, basically, a solute and solvent. The solute dissolves on a molecular level, for ex sodium chloride when combined with water creates a saline solution, the ratio of solute to solvent will yield (from lowest concentration to highest) a dilute, saturated or super saturated solution.

What is a dilute solution? What are some examples? - Quora

Defining key concepts - ensure that you can accurately define main phrases, such as dilute solution and solute Reading comprehension - make sure that you pick out the most important information ...

Quiz & Worksheet - What is Solution Concentration? | Study.com

Concentration definition is - the act or process of concentrating : the state of being concentrated; especially : direction of attention to a single object. How to use concentration in a sentence.
