9. Building Feature Based Grammars. Natural languages have an extensive range of grammatical constructions which are hard to handle with the simple methods described in 8..In order to gain more flexibility, we change our treatment of grammatical categories like S, NP and V.In place of atomic labels, we decompose them into structures like dictionaries, where features can take on a range of values.

9. Building Feature Based Grammars
Norms are regarded as collective representations of acceptable group conduct as well as individual perceptions of particular group conduct. They can be viewed as cultural products (including values, customs, and traditions) which represent individuals' basic knowledge of what others do and think that they should do. From a sociological perspective, social norms are informal understandings that ...
