In section we will answer questions, go over common errors in homework solutions and discuss sample problems in more detail than we can in lecture. Each week we will assign a written homework assignment to be turned in and discussed in section.

CSE 142 -- Computer Programming I - Google Sites
The solution will always be a number made up of digits 1-9 (no 0). Its length is determined by a class constant and shared with the user in the introduction. You must exactly reproduce the format and behavior of this sample run (user input is bold and underlined): Welcome to CSE 142 Bagels! I'm thinking of a 4 digit number.

Accused of cheating CSE 143... Need advice submitted 4 ... I got the same notice about my last assignment for CSE 142 last year. It's not a big deal. There was actually a line of people waiting to talk to him when I went last year so you know this is not uncommon. ... Talk with the instructional staff and explain your solution, down to your ...

Accused of cheating CSE 143... Need advice : udub - reddit
This is my course review for CSE 143 at the University of Washington. The class is a continuation of CSE 142, so most of the things are similar to what I already wrote there. I also concurrently took CSE 390 (for CSE 143) with this course. Just some notes: The homework assignments were actually nontrivial this quarter.

Riley was an amazing lecturer. I took CSE 143 with her and she definitely knew what she was talking about. She had great slides and extremely useful office hours. Devoted to her students and their enjoyment in the info. She would make extra offices hours for students to talk about anything related to tech or more homework! IPL TAs were chosen well.

Riley Porter at University of Washington ...
Since both subproblems 3 and 4 have integer-valued solutions, we can fathom the corresponding nodes of the three. The solution to subproblem 3, (2,1), becomes the new incumbent solution with $z^*=13$. Since all the nodes are fathomed,the branch-and-bound process terminates with the optimal solution $x1 = 2$, $x1 = 1$, $z = 13$.
