David E. Simon is a partner in Probitas Corporation, a software development consulting firm. Much of his work at Probitas is in embedded systems for firms such as Apple, Adobe, Hewlett-Packard, and Symbol Technologies. David has 20 years of experience in software development, and is the author of three previous books.

An Embedded Software Primer - David E. Simon - Google Books
Introduction to Reentrancy Virtually every embedded system uses interrupts; many support multitasking or multithreaded operations. These sorts of applications can expect the program's control flow to change contexts at just about any time. When that interrupt comes, the current operation gets put on hold and another function or task starts running.
