CSS3 has some new values for sizing things relative to the current viewport size: vw, vh, and vmin.It is relevant to bring up now, because it's shipping in Chrome 20 (canary at the time of this writing).And not behind a flag, it just works. Production usage isn't quite there, but it will be soon enough.

Geb was born out of a desire to make browser automation (originally for web testing) easier and more productive. It aims to be a developer tool in that it allows and encourages the using of programming and language constructs instead of creating a restricted environment. It uses Groovy's dynamism to remove the noise and boiler plate code in order to focus on what's important — the ...
