Css High Resolution Images
Abstract. CSS is a language for describing the rendering of structured documents (such as HTML and XML) on screen, on paper, in speech, etc. This module contains the features of CSS level 3 relating to the <image> type and replaced elements.

CSS Image Values and Replaced Content Module Level 3
One other thing to mention (as I understand it, although I can't claim to be an expert): If your browser size changes — e.g. because a desktop user resizes the window or a mobile user switches from landscape to portrait — the <picture> syntax obliges the browser to switch images, downloading a new file. Which is really bad for bandwidth, and overall webpage performance, if the new file ...

Responsive Images: If you're just changing resolutions ...
In Responsive Design, we learned how to use media queries to create separate mobile, tablet, and desktop layouts.Now, we're going to add images to the mix. Just as media queries let us conditionally present different CSS rules, we want to display different images based on the user's device.

About "Can I use" provides up-to-date browser support tables for support of front-end web technologies on desktop and mobile web browsers. The site was built and is maintained by Alexis Deveria, with occasional updates provided by the web development community.The design used as of 2014 was largely created by Lennart Schoors.. FAQ

Can I use... Support tables for HTML5, CSS3, etc
Once a strategy has been nailed down for dynamic images, create a rule table with all the layout options for the images. Below is an example. It's even worth looking into analytics to determine the most important devices and viewport sizes.

Planning for Responsive Images | CSS-Tricks
All CSS properties also accept the CSS-wide keyword values as the sole component of their property value. For readability these are not listed explicitly in the property value syntax definitions. For example, the full value definition of border-color is <color>{1,4} | inherit | initial | unset (even though it is listed as <color>{1,4}).. Note: This implies that, in general, combining these ...

CSS Values and Units Module Level 4 - w3.org
Ken Burns is a type of panning and zooming effect commonly used in video production to bring still images to life. This image slideshow adds an awesome Ken Burns effect to each image during transition, with the ability to show a corresponding description.

Minimize HTTP Requests. tag: content. 80% of the end-user response time is spent on the front-end. Most of this time is tied up in downloading all the components in the page: images, stylesheets, scripts, Flash, etc. Reducing the number of components in turn reduces the number of HTTP requests required to render the page.

Flexible Grid. Let's see how this formula works inside of a two column layout. Below we have a parent division with the class of container wrapping both the section and aside elements. The goal is to have have the section on the left and the aside on the right, with equal margins between the two. Normally the markup and styles for this layout would look a bit like the following.
