In computer engineering, microarchitecture, also called computer organization and sometimes abbreviated as µarch or uarch, is the way a given instruction set architecture (ISA) is implemented in a particular processor. A given ISA may be implemented with different microarchitectures; implementations may vary due to different goals of a given design or due to shifts in technology.

3D printing, also known as additive manufacture (AM), is a process for constructing 3D physical objects from digital models through the successive layer-by-layer deposition of materials such as plastic, metal, ceramics, or even living cells (Bhatia & Ramadurai, 2017).The 3D printing concept was first proposed by Charles W. Hull, using a stereo-lithography to make polymer objects in the 1980s.
