Css Media Screen Resolution
Media queries can be used to check many things, such as: width and height of the viewport; width and height of the device; orientation (is the tablet/phone in landscape or portrait mode?) resolution; Using media queries are a popular technique for delivering a tailored style sheet (responsive web design) to desktops, laptops, tablets, and mobile phones.

CSS @media Rule - W3Schools Online Web Tutorials
1 Answer 1. active oldest votes. up vote 4 down vote accepted. A screen of 400px fits inside both your queries, that means it will get both values but the last one set will prevail per CSS cascading rules. You can flip the order of the queries or specify a min-width in the second one.

css - Resolution with media screen - Stack Overflow
I am currently trying to design a layout which will be compatible for multiple screen sizes. The screen sizes I am designing for are listed below: Screen Sizes: 640x480 800x600 1024x768 1280x102...

html - CSS media queries for screen sizes - Stack Overflow
Media Queries Simple Examples. One way to use media queries is to have an alternate CSS section right inside your style sheet. The following example changes the background-color to lightgreen if the viewport is 480 pixels wide or wider (if the viewport is less than 480 pixels, the background-color will be pink):

CSS Media Queries - W3Schools
In CSS media the difference between width and device-width can be a bit muddled, so lets expound on that a bit. device-width refers to the width of the device itself, in other words, the screen resolution of the device. Lets say your screen's resolution is 1440 x 900. This means the screen is 1440 pixels across, so it has a device-width of 1440px.

CSS media queries: width versus device-width - JavaScript
This page lists a ton of different devices and media queries that would specifically target that device. That's probably not generally a great practice, but it is helpful to know what the dimensions for all these devices are in a CSS context.

Media Queries for Standard Devices | CSS-Tricks
Changing Layouts Based on Screen Size. You can also use the CSS media query for making your multi-column website layout more adaptable and responsive for devices through little customization. The following style rule will create a two column layout if the viewport size is greater than or equal to 768 pixels, but if less than that it'll be rendered as one column layout.

Understanding the CSS3 Media Queries - Tutorial Republic
A CSS media query that captures almost all high DPI aware devices. - high-dpi-media.css

A CSS media query that captures almost all high DPI aware ...
The <resolution> CSS data type, used for describing resolutions in media queries, denotes the pixel density of an output device, i.e., its resolution. On screens, the units are related to CSS inches, centimeters, or pixels, not physical values.

<resolution> - CSS: Cascading Style Sheets | MDN
Media queries are useful when you want to modify your site or app depending on a device's general type (such as print vs. screen) or specific characteristics and parameters (such as screen resolution or browser viewport width).

Using media queries - CSS: Cascading Style Sheets | MDN
In this post I'm going to first introduce media types and media feature descriptors, then I'll explain media queries. Media types. Used in media queries and @import declarations, media types allow us

to determine on which media a CSS file, or a piece of CSS, is loaded.

CSS Media Queries and Responsive Design - flaviocopes.com

We've covered using CSS media queries to assign different stylesheets depending on browser window size.In that example, we changed the layout of the entire page based on the space available. It isn't required that we make such drastic changes with this technique though, so in this tutorial we'll go over a design tweak with a smaller scope.

CSS Media Queries & Using Available Space | CSS-Tricks

Otherwise known as "resolution dependent layouts". Single website, different CSS files for rearranging a website to take advantage of the size available.
