CGS can be used as a primary laboratory module for introductory biology or genetics courses, or as a supplement to a hands-on genetics module with real organisms. In addition to mice and Arabidopsis (plants), test crosses can be performed with Drosophila melanogaster (fruit flies) using the CGS software. If you do not have an account and would ...

Drosophila Genetics Simulation
Drosophila is an interactive simulation activity that enhances the traditional fruit fly laboratory experience. The experience takes place in a virtual environment where students have an unlimited ability to design experiments and analyze patterns of genetic inheritance to discover the principles of genetics.
