Complex Number. The complex numbers are the field of numbers of the form, where and are real numbers and i is the imaginary unit equal to the square root of , .When a single letter is used to denote a complex number, it is sometimes called an "affix."In component notation, can be written .The field of complex numbers includes the field of real numbers as a subfield.

where is a positive real number called the complex modulus of , and (sometimes also denoted) is a real number called the argument.The argument is sometimes also known as the phase or, more rarely and more confusingly, the amplitude (Derbyshire 2004, pp. 180-181 and 376).. The complex argument of a number is implemented in the Wolfram Language as Arg[z].
